Ultimate Guide for Magento 2 CookieNotification

Introducing Magento 2 CookieNotification the ultimate extension important for websites that use cookies to collect user data, as it helps you comply with privacy regulations and informs users about your website's cookie usage. Here's a step-by-step guide on how to implement a cookie notification in Magento 2:

- Allows admin to set one of the below events to perform when a user closes the notice.
    1.Never show again
    2.Hide for the rest of the day
    3. Hide for the rest of the session
- Option to auto-hide cookie notice popup after a specific time span.
- Option to expire the cookie agreement after specified days.
- Option to set custom cookie consent message.
- Option to set custom text for accept, close and privacy policy buttons on the cookie notice.
- Easily redirect users to selected privacy policy page to read more about cookie usage.
- Customize position of the cookie notice popup and bar.
- Customize text color border size of the cookie notice popup and bar.
- Auto hide cookie notice popup and bar.

How to install the extension

1. **Install via composer (recommend)**

MageINIC

- Enable maintenance mode **php bin/magento maintenance:enable**
- Run the command **composer require mageinic/cookie-notification**
- Run the command **php bin/magento module:enable MageINIC_Core MageINIC_CookieNotification**
- Run the command **php bin/magento setup:upgrade** to install the extension
- Run the command **php bin/magento cache:clean** to clean the cache
- Disable maintenance mode **php bin/magento maintenance:disable**
- Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.

2. Upload via ZIP/Archive

- Back up your store's database and web directory
- Download the extension zip file and extract the zip file
- Transfer the **MageINIC** folder to the Magento 2 **app/code/** directory on the server
- Enable maintenance mode **php bin/magento maintenance:enable**
- Run the command **php bin/magento module:enable MageINIC_Core MageINIC_CookieNotification**
- Run the command **php bin/magento setup:upgrade** to install the extension
- Run the command **php bin/magento cache:clean** to clean the cache
- Disable maintenance mode **php bin/magento maintenance:disable**
- Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.
